Production Control Specialist, #162, BWT 1-6, LAD-3

1. Analyzes customer's work requests pertaining to hull/structural work involved
2. Estimates initial manhours and materials, applies appropriate references to work specifications, ie., associated plans,, letters, instruction books, etc.
3. When required, conducts on board investigation and witnesses equipment tests to obtain operating data. Inspects materials to correct deficient areas, selects substitute material. Determines the scope of work involved in correcting defects and/or damage and prepares investigation reports.
4. Drafts job order, contract work specification and estimates of manhour and material quantities and costs for each work step, determines step by step shop operations. Indicates contractor personnel applicable authoritative guides to be referred to in the course of equipment/system repair operations.
5. Determines and initiates Job Material List (JML) for all materials, repair parts and equipment requisitions.
6. Makes additional specifications on the basis of revision requests, supplemental investigations, test results and interim reports, and then provides estimates for manhour and material costs necessary for final job completion

Performs other related or incidental duties as assigned.
